LITTLE BANKING STORIES

### A Neighbor's Plan

ONE OF YOUR FRIENDS is quietly building up a snug little fortune. You will be surprised some day and wonder how he did it. But it is a very simple story.

This man does not have a large income. He has never made a large savings deposit in his life. Small deposits made every week is the secret of this man's success. His savings account shows a steady climb for years,

The average man fails to win because he is not willing to make small savings deposits and make them as often as possible.

Most any one can see the importance of making a big deposit-but many fail to understand the, value of the small ones.

Deposits made on or before Monday, March 6th, draw interest from March 1st.

#### In The Day's News.

The Federal bench loses one of its most picturesque figures today when Kenssaw M. Landis doffs his judicial robes to devote his whole attention to his duties as head of organized baseball. For seventeen years Judge Landis has presided over the Federal court for the Northern District of Illinois. His unique conduct in court, where he frequently took over the examination of witnesses himself, caused him to be feared by all lawbreakers. At the same time his reputation of admin'stering justice, regardless of the technicalities of the law, brought him universal respect. He was vigorous in his attitude against anti-Americans during the war. In every war case brought before him where the defendant was found guilty, the judge imposed drastic sentences and scathingly denounced anyone who seemed un American. Judge Landi: first became nationally famous when he fined the Standard Oil Company of Indiana \$29,240,000, which decision later was reversed by a high

#### SAW SIGNIFICANCE IN MOLES

Writer of Long Ago Pointed Out the Be Better Looking-Take Meaning of Spots on the Human Anatomy.

> Have you a little brown mole concealed somewhere about your anatomy that you sometimes show to your friends-and sometimes don't? Well, every little mole has a meaning of its own, according to a chap-book that was current in the Eighteenth century, entitled "Dreams and Moles, With Their Interpretation and Significance" (printed and sold in Aldermary churchyard, Bow lane, London). Whether you are to be happy or unhappy, lucky or unlucky in life, depends upon where your little pet is located. Here are some of the interpretations given in the old chap-book:

A mole on the right shoulder denotes happiness to man or woman.

A mole on the left shoulder denotes a man to be quarrelsome, but a woman to have many husbands, On the left cheek denotes frankness

in man or woman, On the left ribs, cruelty in man, vanity and pride in woman.

Near the right shoulder, you are to be a slave to love if a man, and to be beloved of great men, if you are a woman.

A mole on the right side of the abdomen means riches for a man and happiness in marriage for a woman. One under the right breast presages good fortune in your ventures; on the

back, riches and honor, A mole on the right arm denotes that you will rule your own household; one on your left arm, that you will be a slave to duty.

A mole on the right hip signifies good fortune in wedlock to man or woman,-Kansas City Star.

#### WHEN 'SPECS' WERE NOVELTY

Many People Wore Them Because It Was Considered the Fashionable Thing to Do.

In the days when spectacles were introduced the world was not all wise. Glasses became so fashionable that people did not wait until necessity compelled them to adopt the new custom. Whether their eyesight was bad or good, those who would be stylish wore spectacles. In Spain they formed part of the costume of every welldressed person.

The object of the wearer in putting on glasses was to increase the gravity of his appearance and render himself more directly imposing. A young menk, who had, through the assistance of his family, caused his order to succeed in an important lawsuit, felt himself liberally rewarded when the prior, having embraced him warmly, testified his gratitude by saying, "Brother, put on spectacles."

The glasses of spectacles were proportioned in size not to the eyes, but to the rank of the wearer, those worn We examine your eyes with by the Spanish nobles being as large bly elected as Regent Admiral the most scientific instruments, as one's hand. ### Too Crowded,

. . . So Daniel Boone was now on his way westward to Missouri, to a new land of fabled herds and wide spaces. . . , Waving his last farewells, he floated past the little groups -till their shouts of good will were long silenced, and his fleet swung out upon the Ohlo,

As Boone sailed down the beautifut river which forms the northern boundary of Kentucky, old friends and newcomers who had only heard his same rode from far and near to greet and godspeed him on his way, Some times he paused for a day with them. Once at least-this was in Cincinnati where he was taking on suppliessome one asked him why he was lonying the settled country to dare the frontier once more.

"Too crowded," he answered; "I want more elbow-room!"-Constance Lindsay Skinner,
